## BERMUDA & ZOYSIA GRASS

- R-1 LATE WINTER TREATMENT:** Pre-emergent weed control to stop crabgrass and annual spring weeds before they start. Broadleaf and grassy weed controls are applied to keep unsightly winter weeds from over-running your dormant lawn.
- R-2 SPRING TREATMENT:** A second application of pre-emergent for control of crabgrass and other annual weeds. Broadleaf and grassy weed controls are included in order to further battle any weeds.
- R-3 LATE SPRING TREATMENT:** Heavy rate of fertilizer to help awaken your lawn from winter dormancy. Pre-emergent weed controls are applied to help extend control through the late summer months. Spot treatment weed controls for any broadleaf or grassy weeds are applied as necessary.
- R-4 EARLY SUMMER TREATMENT:** Special blended of slow release fertilizer to feed your lawn when it is growing fastest and to maintain the color. Spot treatment weed controls for any broadleaf or grassy weeds are applied as necessary. Insect controls applied if turf-damaging levels are present.
- R-5 SUMMER TREATMENT:** Heavy rate of balanced slow release fertilizer to maintain color and encourage turf density during your turf's peak nutritional needs. Spot treatment weed controls for any broadleaf or grassy weeds are applied as necessary. Insect controls applied if turf-damaging levels are present.
- R-6 EARLY FALL TREATMENT:** Pre-emergent weed control is applied to help prevent poa-anna and other winter annual weeds. Fertilizer designed to supply your lawn with the necessary nutrients prior to winter. Spot treatment weed controls for any broadleaf or grassy weeds are applied as necessary.
- R-7 LATE FALL TREATMENT:** A second application of pre-emergent weed control to extend control of winter annual weeds from overrunning your lawn during winter dormancy. Spot treatment weed controls for any broadleaf or grassy weeds are applied as necessary.
- R-8 WINTER TREATMENT:** Lime is applied to help balance and maintain the soils pH. Balanced soil pH allows for proper uptake of essential plant nutrients. Spot treatment weed controls for any broadleaf or grassy weeds are applied as necessary.

Grassy weeds like Nutgrass, Dallisgrass, and other types of grasses and broadleaf weeds are treated with the regular application at no additional charge. **If present, turf damaging insect and fungus are treated at no charge for full service customers.** Preventive applications for grubs, fire ants, and fleas & ticks are available at an additional charge.

**We offer free service calls between applications if necessary.**
