FESCUE TURF PROGRAM

- R-1 LATE WINTER TREATMENT:** Pre-emergent weed control to stop crabgrass and annual spring weeds before they start. Fertilizer is applied to help green-up and thicken your lawn. Spot treatment weed controls for any broadleaf weeds are applied as necessary.
- R-2 SPRING TREATMENT:** A second application of pre-emergent for control of crabgrass and other annual weeds. Special blended of slow release fertilizer to feed your lawn when it is growing fastest and to maintain the color. Broadleaf weed controls are included in order to further battle any weeds.
- R-3 LATE SPRING TREATMENT:** Heavy rate of balanced slow release fertilizer to maintain color and encourage turf density during your turf's peak nutritional needs. Spot treatment weed controls for any broadleaf weeds are applied as necessary.
- R-4 EARLY SUMMER TREATMENT:** Special blended fertilizer with iron to feed and maintain the color. Fungicides are applied to help fight off diseases like brown patch. Spot treatment weed controls for any broadleaf weeds are applied as necessary. Insect controls applied if turf-damaging levels are present.
- R-5 SUMMER TREATMENT:** Special blended fertilizer with iron to feed and maintain the color. Fungicides are applied to help fight off diseases like brown patch. Spot treatment weed controls for any broadleaf weeds are applied as necessary. Insect controls applied if turf-damaging levels are present.
- R-6 EARLY FALL TREATMENT:** Lime is applied to help balance and maintain the soils pH. Balanced soil pH allows for proper uptake of essential plant nutrients. Spot treatment weed controls for any broadleaf or grassy weeds are applied as necessary.
- R-7 LATE FALL TREATMENT:** A heavy rate of fertilizer is applied to help the turf recover for summer stress and help with root strength on over seeded lawns.
- R-8 WINTER TREATMENT:** Fertilizer for root strength and to help the turf stay green thru the winter. Spot treatment weed controls for any broadleaf weeds are applied as necessary.

Grassy weeds like Nutgrass, Dallisgrass, and other types of grassy and broadleaf weeds are treated with each regular application at no additional charge. If present, turf damaging insect and fungus are treated at no charge for full service customers. Preventive applications for grubs, fire ants, and fleas & ticks are available at an additional charge. **We offer free service calls between applications as needed.**
